This is the second office action for application number 10/646,864, Display Apparatus, filed on August 25, 2003.

### ***Response to Amendment***

The examiner apologizes for the long delay of responding to the amendment filed on September 23, 2004. The delay was a result of unforeseen circumstances and was not intentional. The Notice of Allowance, dated December 27, 2004, shown in PAIR is hereby vacated.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations of the display apparatus comprising the rod supporter used with the cylinder support must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 4 and 30-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Neither the specification nor the drawings teach or show the cylinder supporter works with the rod supporter. The specification and drawings only teach how one or the other of the cylinder supporter or rod supporter works separately with the display apparatus. How would the rod supporter fit within the cylinder supporter if the hole for the cylinder supporter is shown and described to receive the cylinder rod which is substantially smaller in diameter than the rod supporter?

Art Unit: 3632

***Allowable Subject Matter***

Claims 1, 5-9, 13-17, 19-22, and 24-29 are allowed.

***Response to Arguments***

Applicant's arguments, see remarks, filed September 23, 2004, with respect to rejections under 35 U.S.C. 102(b) and 35 U.S.C. 103(a) have been fully considered and are persuasive. The rejections of claims 1, 2, 4-6, 8-22, 26, 27, and 33 have been withdrawn.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
